## **“TIMBER HOUSE”**

### **BIG TIMBER FRAME DIVISION - TIMBER PANEL HOMES**

- 12” x 12” Douglas Fir, dead standing, premium grade Post & Beam Timber Frame Homes.
- We build the 2” x 6” Sturdy-Wall-Panel-System for in between the 12” x 12” Douglas Fir Timbers. These panels are 5/8” OSB sheeting, glued & nailed with 2” rigid or R-20 insulation, complete with siding and ready for trim. After plumbing & wiring we are insulating with R-21 for complete R-40+ Sturdy-Wall-System.
- Exceeding all codes and engineering with the 12” x 12” Douglas Fir timber frame and the Sturdy-Wall-System with the R-40+ & the R-38 in the roof.
- Drilled for wiring in the panels and timbers.
- The delivery and set-up with the 12” x 12” Douglas Fir Timber Frame & the Sturdy-Wall-System is all included with this package.
- This is the most builder-friendly Post and Beam on the market today.
- Very distinctive, affordable & tailored to your life style.
- Light & Heavy Timber Designs.

*We put the timber – in the timber frame!!*
